If, however, a doctor performed a more complicated procedure on a patient’s liver, 47350 would no longer be the correct code to use. If we look in the CPT manual, we find the code 47360 below 47350. Code 47360 reads “complex suture of liver wound or injury, with or without hepatic artery ligation.”

**CPT Quiz I Flashcards | Quizlet**
Current Procedural Terminology (CPT) is a medical code set that is used to report medical, surgical, and diagnostic procedures and services to entities such as physicians, health insurance companies and accreditation organizations.

Look for the primary CPT code you are billing in Column 1. Check Column 2. If you are billing any of the codes listed, they will be considered mutually exclusive or linked. If the code in Column 2 has a “y” next to it, you can add modifier 59. If there’s an “n,” then you should not bill the code in combination with the code in Column 1.
